

# **BLIND SPOT WARNING SYSTEM FOR AN AUTOMOTIVE VEHICLE**

## **Abstract of Disclosure**

A warning system (12) for a source vehicle (10) is illustrated. A camera (20) generates a plurality of images. A controller (30) is coupled to an indicator (36). The controller (30) generates a size signal and position signal for a rear-approaching vehicle. The controller (30) activates an indicator when a rear-approaching vehicle enters a blind spot (14) in response to the size signal and position signal.
